## **New Pharmacy Opens in Brooklyn**

November 2016

Brooklyn, NY – This fall marks the grand opening for a brand-new, independently owned, pharmacy in Brooklyn. Located on the corner of Clarkson Ave and Nostrand Ave, just one block West of the hospital, Green Life Pharmacy opened its doors in September and has brought a variety of needed products and services to the area.

“We are excited to be a part of this community,” said Arshad Tariq, owner of Green Life Pharmacy. “We are especially excited about bringing in our medication packaging, medication reviews and refill synchronization programs to the area. It’s combined services like these that really help out those people who have to take multiple medications daily – and it’s not something that every chain pharmacy offers.”

In addition to typical prescription medications, Green Life Pharmacy provides free local delivery to residents, immunization services, a variety of diabetic products and medications for pets, as well as the ability to special order products, and so much more.
